A. APPLICATION - NO WORK SHALL START BEFORE APPLICATION IS APPROVED

1. All "Water & Sewer Service Applications" must be filled in completely and returned to the Town Clerk's office.
2. Connection Fees are site specific and will be determined by the Town Clerk's office.
3. All fees must be paid in full before your application is approved.
4. Homeowners who will be performing their own work must provide proof of homeowners insurance, as required, in the amount acceptable to the Town.
5. Contractors hired to perform the work must provide evidence of the existence of a performance bond and liability insurance, as required, in the amount acceptable to the Town and shall name the Town of Batavia as additional insured.
6. Non-residential properties must submit plans indicating the size, material, length, and location of the proposed service line.
7. Agricultural properties that believe they are eligible to receive the agricultural rate must submit an Agricultural Water Rate Request Form (see the form for eligibility requirements).

B. NEXT STEPS OF APPLICATION APPROVAL

1. Your application will be reviewed by the Town of Batavia Water/Wastewater Department.
2. The Owner will either receive an approved application or will be contacted if adjustments are required to the proposed service line design.
3. You or your contractor may install the water service in accordance with the approved service application and the Town of Batavia standard service handouts.
4. Contact the Water/Wastewater Department at 585-356-4900 to schedule an inspection.
5. You will be informed at the time of the inspection when your service will become live.

C. CONSTRUCTION

1. One or more handouts will be provided by the Town Clerk's office upon submission of the "Water & Sewer Service Application." All work must be completed in accordance with these handouts (or per a design done by a licensed design professional), and/or, as approved by the Town of Batavia.
2. All work must be in compliance with the New York State Plumbing Code, the New York State Department of Health (NYSDOH), and the requirements of the Town of Batavia.
3. Utility providers must be notified, and their lines located prior to any excavation (digging) by law. Owner/Contractor must call Dig Safely New York at least two (2) working days prior to any ground breaking by dialing 811.
4. Sewer pipe must be at least ten (10) feet from any water line. Said pipe and installation, both outside the structure and within, must be in full compliance with the Plumbing Code of New York State and with the requirements of the Town of Batavia.
5. A Trench Inspection prior to backfilling and an Interior Inspection are both required by the Town of Batavia. Twenty-four (24) hours advanced notice is required to schedule these inspections.

Direct questions to: Water/Wastewater Department, at (585) 356-4900
D. SPECIAL DESIGN CRITERIA: WATER SERVICES

1. Small diameter water meter installations normally include a single check valve on the outlet side of the water meter; this valve, or a Backflow Preventer, creates a closed water system within the premises. To avoid plumbing system damage due to line pressure surges, thermal expansion, and/or hydraulic shock (water hammer) you must install protective plumbing devices. The water customer must install a pressure regulating valve (PRV) and either a thermal expansion tank or a pressure relief valve to protect the internal plumbing system within their premises. A hydraulic shock absorber (water hammer arrestor) may also be needed. An approved shut-off valve is required on the interior. The PRV must be installed immediately inside the building; the thermal expansion tank and/or pressure relief valve and the hydraulic shock absorber(s) (water hammer arrestor(s)) shall be located near the source(s) of the thermal expansion and hydraulic shock, per the New York State Plumbing Code and the requirements of the Town of Batavia.

2. Any existing or potential condition within, or affecting your plumbing system, or any water use, or auxiliary water source that may create a hazard to the Public Water Supply will require elimination, isolation, or containment protection by the installation of a Cross Connection Control Containment Device per the requirements of the New York State Department of Health (NYSDOH), New York State Plumbing Code, and the Town of Batavia. All work must be inspected by the Town of Batavia.

3. Well(s) must be disconnected from any plumbing connected to the Public Water System, or separated by installing a NYSDOH Approved Backflow Prevention Device to protect the Public Water Supply, or by permanently abandoning the well/auxiliary water supply per the Town of Batavia and NYSDOH Well Abandonment and other guidelines (to include the removal of items within the well casing). All work must be inspected by the Town of Batavia.

4. If a Back Flow Device is needed – you must contract with a Licensed Professional Engineer for the design and application of the device OR the Town of Batavia offers this service (see Backflow Connection Application).

E. DEFINITIONS

- **Agent** – A third party hired by the property owner to manage the utility connection (ie. contractor or engineer). Property owners are not required to hire an agent but if a third party is the main point of contact, the Agent Contact Information section of the application must be completed.

- **Combined Service** – a single service line that provides both domestic and fire service to the property.

- **Domestic Service** – a service line that will provide water for sanitary uses only (drinking water, showers, toilets, etc…)

- **Fire Service** – a service line that will provide water only for a designated private fire protection system.

Inspection

Has a variance been granted for this installation?  □ Yes  □ No  (If yes, please give details below)

Inspector Signature: ______________________________________  Date: _______________

The Town of Batavia has inspected the above referenced premises and found the water service construction to be in accordance with the Town of Batavia standards. This inspection does not relieve the property owner from responsibilities for water service line maintenance and in no way prejudices the Town of Batavia's right to inspect or regulate the building water line or any other portions of premises water system.
